PADEL ALBA
PREMIUM PADEL COURTS

OUR MISSION

To manufacture and supply the best padel courts on the market, offering high quality and durable solutions to meet the needs of our customers. We are committed to promoting the growth of padel as a sport and to contributing to the development of high quality sports facilities around the world.

OUR VISION

To be a world leader in the manufacture of padel courts, recognised for our innovation, quality and commitment to sustainability. To be the partner of choice for clubs, sports facilities and padel enthusiasts looking for high performance.

PADEL CRAFT

POWERED BY
PADEL ALBA

Strength, safety and reliable performance

The Padel Craft is a robust and versatile padel court designed to **offer excellent performance**, safety and durability in all types of sports facilities. Its reinforced galvanised steel structure, certified tempered glass and professional-quality finishes make it a reliable solution for clubs seeking a resistant, functional and fully customisable court.

Dimensions: 20 × 10 m

Structure: high-strength galvanised steel

Glass: certified 10 or 12 mm tempered glass

Turf: 10 mm texturised monofilament turf

Lighting: professional LED system

Finish: oven-cured epoxy-polyester coating

Customisation: structure and turf available in different colours

Standards: compliant with FIP standards and applicable European regulations

PROFESSIONAL LIGHTING

Uniform LED lighting without shadows or glare, suitable for amateur use, competitions and high-speed 4K and 8K recording without flickering.

MAXIMUM STRENGTH AND SAFETY

The court combines reinforced electrowelded mesh with certified tempered glass installed on neoprene to reduce vibrations and improve durability.

FULLY CUSTOMISABLE DESIGN

The steel structure can be finished in different RAL colours, while the turf is available in a range of colours to adapt the court to each project or club identity.

ROBUST AND FUNCTIONAL DESIGN

A reinforced steel structure provides excellent stability and resistance, making it suitable for both indoor and outdoor installations.

PANORAMIC

Strength meets panoramic design

The Panoramic combines the of a **reinforced structure** with the clean aesthetics of a **panoramic view**. Designed to offer an excellent experience for both players and spectators, it provides visibility, safety and high performance while complying with Spanish and International Padel Federation standards.

Dimensions: 20 × 10 m

Structure: high-strength galvanised steel

Glass: certified 12 mm tempered glass

Turf: 10 mm texturised monofilament turf

Lighting: professional LED system

Access: 100 cm double-opening entrance

Finish: oven-cured epoxy-polyester coating

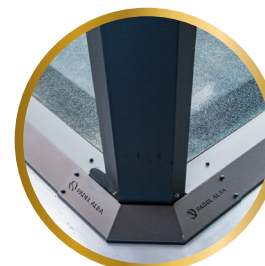

Customisation: structure and turf available in different colours

Standards: compliant with FIP standards and applicable European regulations

PROFESSIONAL LIGHTING

Uniform LED lighting provides excellent visibility throughout the court, helping to prevent glare and shadows during play.

ROBUST AND SAFE STRUCTURE

The reinforced galvanised steel structure and electrowelded mesh offer excellent stability, resistance and long-term durability.

PANORAMIC VISIBILITY

Large glass surfaces provide a clear view of the game, creating a better experience for players, spectators and audiovisual coverage.

FULLY CUSTOMISABLE DESIGN

Available in different RAL finishes and turf colours, allowing the court to be adapted to the image of each club, facility or sponsor.

FULL PANORAMIC

Full visibility. Premium design

The Full Panoramic is Padel Craft's most exclusive court, combining panoramic visibility, premium design, strength and high performance for clubs and competitions.

Dimensions: 20 × 10 m

Structure: high-strength galvanised steel

Glass: certified 12 mm tempered glass

Turf: 10 mm texturised monofilament turf

Lighting: professional LED system

Access: 100 cm double-opening entrance

Finish: oven-cured epoxy-polyester coating

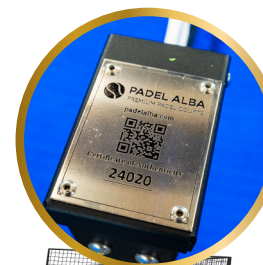

Customisation: structure and turf available in different colours

Standards: compliant with FIP standards and applicable European regulations

PROFESSIONAL LIGHTING

Uniform LED lighting without shadows or glare, suitable for competitions and high-speed 4K and 8K recording without flickering.

MAXIMUM STRENGTH AND SAFETY

Galvanised structure, electrowelded mesh and 12 mm tempered glass installed on neoprene to reduce vibrations and increase durability.

PANORAMIC VISIBILITY

A sleek design minimises the structural elements around the glass, providing a clear view of the game and an excellent experience for spectators.

FULLY CUSTOMISABLE DESIGN

Available in different turf colours and RAL finishes to adapt the court to the visual identity of each club, sports facility or sponsor.

PANORAMIC 125

Maximum strength for extreme conditions

The Panoramic 125 is Padel Craft's most robust court, specially designed for outdoor facilities exposed to extreme weather conditions. It combines a reinforced structure with excellent panoramic visibility, offering maximum resistance, safety and durability without compromising the experience of players and spectators.

Dimensions: 20 × 10 m

Structure: high-strength galvanised steel

Pillars: 100 × 60 × 2 mm profiles

Glass: certified 12 mm tempered glass
Mesh: 50 × 50 × 4 mm electrowelded mesh

Turf: 10 mm texturised monofilament turf

Lighting: professional LED system

Access: 100 cm double-opening entrance

Finish: oven-cured epoxy-polyester coating

Customisation: structure and turf available in different colours

Standards: compliant with FIP standards and applicable European regulations

PROFESSIONAL LIGHTING

Uniform LED lighting helps prevent glare and shadows and is suitable for amateur play, professional competitions and flicker-free 4K and 8K recording.

DESIGNED FOR EXTREME WEATHER

The reinforced steel structure is perfect for outdoor locations exposed to strong winds and demanding weather conditions.

MAXIMUM STRENGTH AND SAFETY

Reinforced pillars, anchor plates, threaded joints and electrowelded mesh provide a solid, safe and highly durable structure.

PANORAMIC VISIBILITY

The transparent 12 mm tempered glass provides a clear view of the game, improving the experience for players and spectators.

FULLY CUSTOMISABLE DESIGN

The structure can be finished in the customer's preferred RAL colour, including two-tone combinations, with several turf colours available to suit each project.

CUSTOMISATION OPTIONS

METALLIC STRUCTURE

**PAINTED IN
2 COLOURS**

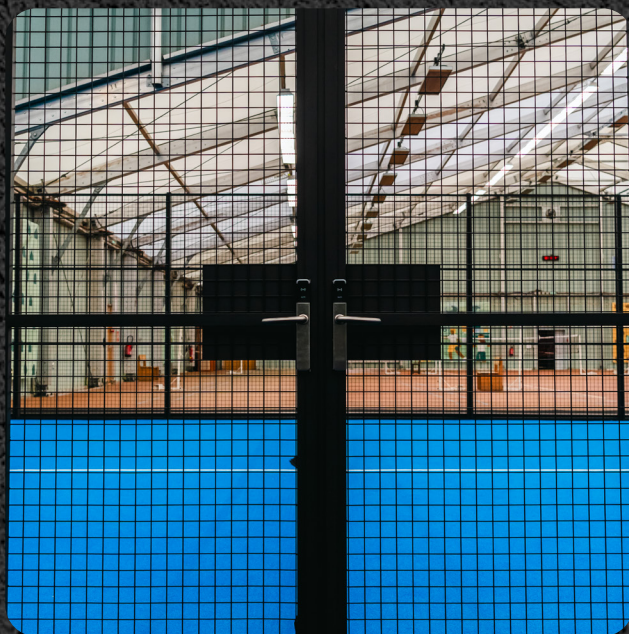

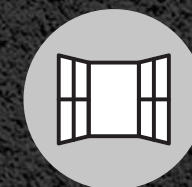

The metal structure is coated with **electrostatic powder paint**. It is applied on the surface of the material and then undergoes a **polymerisation process** in an oven at **high temperatures (between 180°C and 200°C)**. This painting process provides high protection against **corrosion** and **UV rays**, as well as against mechanical impact. **Additional protection in coastal/maritime areas**. In locations with high salt spray exposure, we apply additional corrosion protection measures.

Colour customisation: the structure can be painted in a RAL of the customer's choice, and the rail can even be painted in **two tones for further customisation**.

STRAIGHT

SPOTLIGHTS

Our 200W Padel Light model can be adjusted from 100W to 200W, effectively combining three models in one.

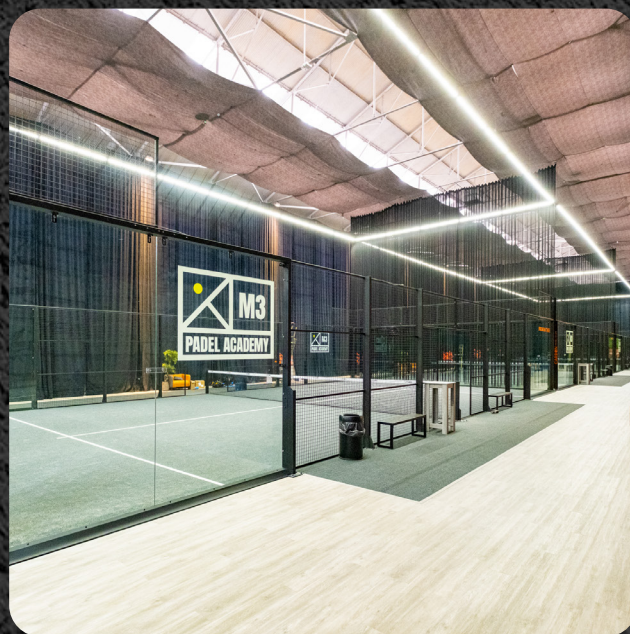

Uniformity of light is key: there should be a homogeneous distribution of lighting throughout the court to avoid shadows or bright spots of light that may distract or hinder play.

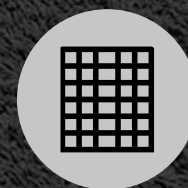

LED floodlights are used as they provide bright and uniform illumination, have low energy consumption, and have a longer life compared to other light sources. In addition, LEDs can be configured to reduce glare.

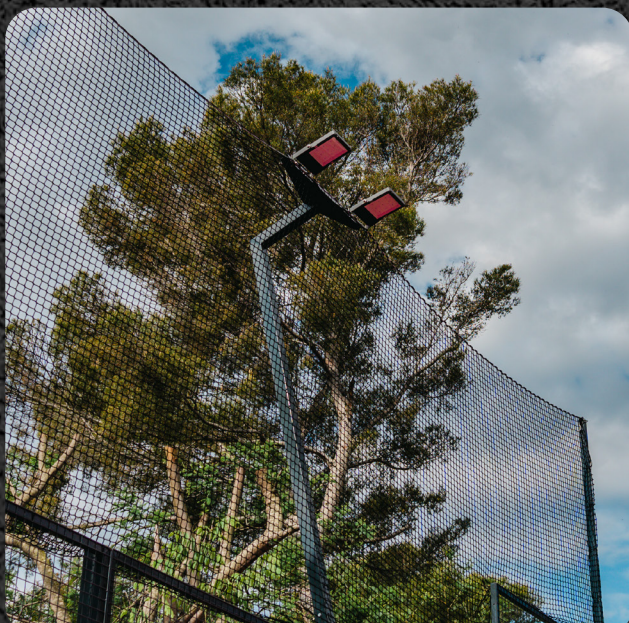

PERIMETER LED HALO LIGHTING

BALL STOP NET

INSTALLATION

Each selected component is integrated to create optimal playing conditions that comply with International Padel Federation regulations.

From the artificial turf to the integral structure to the netting and glass panels, each element is installed with precision to ensure optimal use of space.
